Profile

Computer engineering student at ENSAO (Software Engineering and AI track), focused on full-stack development with Java/Spring Boot, React and Python/FastAPI. Builds web applications and AI features (agents, RAG, NLP), and writes the tests and CI/CD pipelines that make them reliable. Seeking a **6-month full-stack development final-year internship (PFE) starting January 2027**.

Education

Engineering Degree in Computer Engineering – Software Engineering and AI Track, ENSAO	2021–2027
Baccalauréat in Mathematical Sciences A, with Honors (Mention Bien)	2020–2021

Professional Experience

Full-Stack and AI Developer Intern <i>Digitalia Solutions</i>	Jul. – Sep. 2026 <i>Casablanca, Morocco</i>
---	--

- Designed a talent sourcing platform with an AI agent that turns natural-language queries into candidate short-lists ranked by hybrid scoring.
- Secured the API (JWT, RBAC) and set up a DevSecOps CI/CD pipeline (SonarCloud, OWASP ZAP, Trivy): over 93 % backend coverage, 624 frontend tests.

Technologies: Spring Boot, React, FastAPI, LangGraph, MCP, PostgreSQL (pgvector), Docker

Full-Stack Web Developer Intern <i>AMEE</i>	Jul. – Aug. 2025 <i>Rabat, Morocco</i>
---	---

- Developed a leave management application (submission, approval, balances, automatic working-day calculation) with an HR space: absenteeism dashboards, Word/Excel documents and automated email notifications.

Technologies: PHP 8, MySQL, JavaScript, Bootstrap 5, Chart.js, PHPMailer

Academic and Personal Projects

AfriqAI – Feedback Analyzer (team project)	<i>Spring Boot, FastAPI, React, PostgreSQL, Docker, GitLab CI</i>
---	---

- Developed the asynchronous analysis flow in Spring Boot (DONE/FAILED statuses, sentiment aggregation), NLP-based data anonymization (spaCy) in FastAPI before sending to the LLM, and the React dashboard (Recharts).
- Wrote the tests for the Spring Boot and FastAPI backends (83 % and 82 % coverage) and set up the GitLab CI/CD pipeline: tests, Docker image publishing, automated deployment over SSH.

Financial Analysis Terminal	<i>FastAPI, React, Claude API, PDF Processing</i>
------------------------------------	---

- Designed a platform that extracts data from PDF reports, computes financial ratios and provides a conversational assistant based on that data.

Chatbot-MSO – Bilingual Administrative Assistant (team project)	<i>FastAPI, Hugging Face, RAG, Docker</i>
--	---

- Designed the data and RAG pipeline (collection, transformation, ingestion, embeddings, vector database) for a bilingual French/Arabic knowledge base covering 10 user categories.

Jira Clone – Project Management (team project, ongoing)	<i>Spring Boot, React, PostgreSQL, JUnit, Mockito</i>
--	---

- Built 17 of the 34 REST endpoints of the API (Issues and Statuses modules), secured with JWT, with unit tests.
- Developed the Summary and Backlog pages on the frontend (React).

Technical Skills

Backend and API: Java (Spring Boot), Python (FastAPI), REST API, JWT

Frontend: JavaScript (React), HTML, CSS, Bootstrap

Persistence and databases: PostgreSQL (pgvector), MySQL, SQLite

AI and integration: LangGraph, n8n, LLM, RAG, MCP, NLP, Hugging Face, Prompt Engineering

Testing and quality: JUnit, Mockito, Testcontainers, pytest, Vitest, k6, JaCoCo

DevOps and security: Docker, CI/CD, DevSecOps, Linux

Tools and methods: Git, Jira, Scrum

Additional Information

Languages: Arabic (native), French (DELFB2), English (professional)

Certifications: freeCodeCamp (Relational Databases)

Volunteering: AI mentoring for children (Maison des sciences de l'Oriental); event organization (GI Club, ENSAO)
