PROFESSIONAL OBJECTIVE

Engineering student at ENSAO, seeking a 1–2 month internship (PFA). Motivated to design robust software architectures and integrate innovative artificial intelligence services.

TECHNICAL SKILLS

Languages: Java, PHP, Python, C#, JavaScript
Web Dev: Spring Boot, React.js, Symfony, Java EE
Mobile: Android (Java)
Databases: MySQL, PostgreSQL, SQLite, Room
Testing & Quality: JUnit, Mockito, JaCoCo
Systems & Networks: Linux (Ubuntu, Debian), System Admin.
Tools & Methods: Git, Docker, Jira, OpenCV, LaTeX, Scrum
Design: UML, Merise, Figma, Canva

SOFT SKILLS

- Communication
- Teamwork
- Problem-solving
- Adaptability
- Rigor & Autonomy

LANGUAGES

Arabic: Native
French: B2
English: C1

EDUCATION

Engineering Degree in Computer Science 2021 – 2027
National School of Applied Sciences – Oujda (ENSAO)
High School Diploma – Mathematics A, with Honors 2020 – 2021
Lycée Hassan Ibn Tabit – Zaio

PROFESSIONAL EXPERIENCE

Full-Stack Web Development Intern 07/2025 – 08/2025
AMEE – Rabat
Full design and development (CRUD, user roles) of the AMEE eCongé (e-Leave) module. Automated leave request validation workflows and generated analytical charts for HR monitoring.
Technologies: PHP, MySQL, JavaScript

ACADEMIC & PERSONAL PROJECTS

AfriqAI – Feedback Analyzer
3-tier NLP analysis architecture based on service decoupling. Integration of a Python microservice for LLM processing, orchestrated by a Spring Boot backend and a React dashboard.
Technologies: Python, FastAPI, Spring Boot, React, PostgreSQL
Jira Clone – Agile Project Management
Full-stack platform inspired by Jira, built on a scalable RESTful architecture. Implemented a rigorous suite of unit/integration tests and automated code quality control.
Technologies: Spring Boot, React, JUnit, Mockito, JaCoCo, PostgreSQL
Chatbot-MSO – RAG Administrative Assistant
Trilingual virtual assistant (Arabic, Darija, French) for Moroccan administrative procedures. Implemented a RAG pipeline with local vector search, OCR extraction, and multi-container deployment.
Technologies: FastAPI, React, Hugging Face LLMs, FAISS, Tesseract OCR, Docker
Stockify – Inventory Management
Warehouse application with real-time tracking, optimized database modeling, and low-stock alerts.
Technologies: PHP 8.2, Symfony 7, Doctrine, MySQL, Twig, Chart.js
Soukify – Mobile E-Commerce
Android app for Moroccan artisans featuring geolocation, favorites management, and data persistence.
Technologies: Android SDK, Java, Firebase, OpenStreetMap, MVVM

VOLUNTEER EXPERIENCE

Mentor & Workshop Facilitator | *Maison des Sciences de l'Oriental* 09/2024
Led AI awareness workshops (Deep Learning, n8n...) for children.
Organization & Supervision | *GI ENSAO Club* 09/2024
Coordinated logistics and technical aspects of student hackathons and workshops.

CERTIFICATIONS

Sololearn: Agentic Workflows • Java Intermediate • Prompt Engineering
HackerRank: SQL (Intermediate) • Java Skills (Basic)
freeCodeCamp: Relational Databases
Simplilearn: Introduction to Docker
